

Crane Report

PRACTICAL EXAMINATION—SERVICE TRUCK CRANES

NCCCO has established specific safety conditions and guidelines that each practical exam must follow. This Crane Report is a verification tool used to ensure that all testing parameters are within strict, safe working conditions. Before testing is conducted, the crane being used for testing must have its own unique report filled out. This report should be completed in ink, signed by the Examiner, and sent with the Site Report to: NCCCO—Testing Services Department, 1960 Bayshore Blvd., Dunedin, FL 34698.

REMINDER: Each crane used must have a separate report filled out.

EXAMINER CHECKLIST

All of the following requirements must be met to conduct Practical Exams:

- Verify crane has a current annual/comprehensive inspection or initial inspection if the unit has not been in service for more than 12 months; all supporting documentation must be in accordance with OSHA standards
- Complete a pre-operational shift inspection to verify no deficiencies are present that would affect safety or performance
- Block reeved with two parts of line
- Set up and leveled in the location specified on the CAD, ready for operation in accordance with the manufacturer's recommendations
- All outriggers/stabilizers properly set per manufacturer's recommendations (intermediate, mid, or short-span outriggers not permitted)
- Blocking or cribbing, as necessary, to provide sound foundation
- No jib installed
- If using remote control, sufficient batteries on hand to conduct all practical exams
- If necessary, fully deploy manual boom extensions
